Friendly and filled with laughter

At Persley Castle we respect our residents' desire to make their own decisions. We encourage people to live the life they want, offering options in all aspects of their day. Residents can relax in their own personal space or choose to socialise in our airy, open-plan shared areas.

Arranged over three floors, most bedrooms are single-occupancy with wash facilities or en-suite bathrooms. They vary in size and style, and residents are encouraged to create their own individual sanctuary, decorating it to their own taste and furnishing it with their belongings and prized possessions. Creating that home-from-home feel is crucial, and we support residents and the family through that transition.

Convivial communal areas are spacious and accessible – perfect for spending time with loved ones or sharing hobbies with new friends. It's a pleasure for our team to hear laughter and chatter fill our home as we watch new relationships grow and friendships form. Persley stands next to the River Don and enjoys beautiful woodland views, with pretty gardens at the front and rear of the for residents to enjoy.

We support every resident's independence and, whether they choose to spend time socially or solo, we're always on hand to provide refreshments or a chat.

“My mum is so happy at Persley Castle and it makes all the difference to us as a family. The care and attention is incredible.”

Each resident will work with our team to create a bespoke care plan to support their abilities and aspirations.

Our nursing, clinical and care teams collaborate to offer the very best support to our residents. Skilled staff provide a balance of medical care and lifestyle support to create a nurturing environment

in which to thrive physically and mentally. Care is offered to residents with a wide variety of needs, ranging from personal care to specialist support for dementia, stroke or Parkinson's diagnoses.

Residents can also access other NHS services including dieticians, physiotherapists, district nurses and community psychiatric services. We can also connect with independent consultants including chiropody, podiatry, optician and dental services. And there is an enhanced awareness of mental wellbeing and relevant support is available to our residents, if required.
